Cellular Release Therapy™ Specialty Certification Course **\$900.00**

Training will be held 9-30 through 10-2-2011 and 10-28 through 10-30-2011

Cellular Release Therapy™ is a hypnotherapeutic system which allows the client to clear traumatic experiences without having to remember or reexperience them. This is accomplished in a state of deep relaxation, where ideomotor signals are employed, and the conscious mind is not engaged.

The subconscious mind resides in every cell of the body, and the cells are continuously programmed from the moment of conception. This programming is multi-layered and holographic, as what continues from lifetime to lifetime is the energy system, which contains the record of all previous life experience. This energy system becomes the electromagnetic force matrix which both forms and informs the entire current life body. This information is the fundamental beginning of the database for the body/mind for this lifetime.

CRT includes a detailed protocol which the therapist can use to facilitate as the subconscious of the client is directed to accomplish this clearing.

In this state the client can clear specific experiences, multiple experiences of a given type, emotions, shock and trauma, and beliefs and conclusions which resulted from them. Causal events can be cleared to allow mental and emotional complexes, life scripts and/or physical symptoms which resulted from them to resolve.

Cellular Release Therapy™ is taught as a six day course, divided into two three day modules.

In **Module I** the therapist will learn basic techniques of Cellular Release Therapy™. At the completion of this module the therapist will be able to facilitate for clients to clear traumatic experiences, life patterns and deep life issues. The client will be able to clear root causes without reexperiencing them.

In **Module II** protocols will be taught for addressing specific issues: i.e., weight and eating issues, diseases, addictions, physical conditions, smoking, and relationship issues. Students are encouraged to bring specific applications for addressing during the practicum.

Training for Cellular Release Therapy™ and private sessions can be arranged by contacting Anne DeChenne Drucker, CCHt, at (303) 805-2700, or annedrucker@comcast.net.
